# WHETHER YOU ARE ON CITY *OR* WELL WATER, YOU CAN REST EASY KNOWING YOUR FAMILY IS DRINKING FRESHER, CLEANER WATER FREE OF COMMON CONTAMINANTS AND CHEMICALS THAT CAN SLIP INTO ANYONE'S HOME.

Clean water does not just come from your tap - Our whole house filters and softeners eliminate chlorine agents, remove organics/inorganics, and hardness so your entire family has healthier hair and softer skin.

1

Bad water is bad for you, but safe water is key to life — The U.S. Centers for Disease Control & Prevention (CDC) recommends drinking eight 8-ounce glasses of water every day.

2

Water and health are linked. The top causes of disease outbreaks related to drinking water are Giardia intestinalis, hepatitis A, norovirus, Shigella, and more. There are also health risks related to water contaminated with organic and inorganic matter, other bacteria and viruses and other pollutants.

3

The human body is 70% water, and although a human being can survive a month or more without food, a week without water can be fatal.

4

Running hard water through hot water heating units can cut efficiency by up to 48 percent, and scale buildup can shorten the lifespan of the heating elements inside electric water heaters, causing some to fail after just 1.6 years.

5

Chlorine or chloramines create dry skin and hair, unpleasant taste, and odors.

6

Hard water takes a huge toll on your home, leaving behind deposits of minerals like calcium, magnesium and carbonate that clog up your appliances, create spotty dishes and stains, make your skin dry and your clothes dull and scratchy.

7

Softened water can save you money by keeping appliances at top efficiency and making them last longer. The amount of dish and laundry detergent you use can be cut by half, or even more, if you use softened water.

8

The changing climate and infrastructural decay in America can cause contaminants and other pollutants to work their way into the water supply.

9

Shower heads running hard water lost 75 percent of their flow rate in less than 18 months. When running hard water through faucets, the strainers on the faucets clogged within 19 days.
