

MAKING THE INVESTMENT

INVESTING IN A QUALITY PUMP FOR THE NEEDS OF YOUR FAMILY, FACILITY, OR BUSINESS IS A DECISION THAT CAN GUARANTEE YEARS OF PEACE OF MIND FOR ALL THE ASPECTS WATER DELIVERS TO YOUR LIFE.

Cost is one of the deciding factors when any purchase is made, however a pump should not only be competitively priced but also made from quality components and durable materials. In today's marketplace "cheaply" designed product will give you a limited lifetime of service. Water is a need, and with the right equipment you will be able to sustain your healthy lifestyle without having to worry about bathing, flushing toilets, or running out of readily available drinking water.

When designing our pumps, we selected our domestic materials with durability in mind.

- Heavy-Duty Cast Iron
- Heavy wall, high quality Stainless Steel
- Glass-filled Noryl®
- Fluted Polyurethane
- Balanced Teflon®
- Fully enclosed, glass-filled thermoplastic

Lancaster's proprietary "Survivor" submersible technology deliveries results you can trust. Before each pump leaves our facility, it is put through a rigorous 3-point test. These tests measure flow, pressure, and amps. After passing these high-quality standards, the pump is individually hand packed so that we know our customers satisfaction will be assured.

Choosing the right pump solution for your needs is a very important part of the process. With decades of focused experience, our customer support technicians will cater to all your questions including sizing and selecting. We are also available for troubleshooting and questions during the installation process.

For 75 years Lancaster Pump has been designing and manufacturing our pump lines to deliver proven, dependable products that guarantee performance for every application. We offer a wide range of high quality pumps for residential and commercial applications to keep the water flowing.
